

# Jevon Christopher Loanda

Full Stack Developer

Bogor, Indonesia

jevon.loanda@gmail.com | jevoncl.com | github.com/jevoncloanda | linkedin.com/in/jevoncl

## SUMMARY

I'm a Full Stack Developer at Harita Group, where I build full-stack web applications with CodeIgniter, Node.js, Nuxt.js and MySQL. Before that I worked at Polytron, first as an intern and then as a developer, across Node.js, Go, CodeIgniter and WordPress — building APIs, fixing bugs, and closing the security issues that came out of testing.

## EXPERIENCE

**Harita Group** · Jakarta, Indonesia

Jun 2025 — Present

*Full Stack Developer*

Building full-stack web applications with CodeIgniter, Node.js (Express), MySQL, SSMS and Docker.

- Developed full-stack web applications for internal use
- Introduced the Git version control to legacy systems, leading to faster development cycles
- Introduced Docker for containerisation to legacy systems, simplifying application deployment and environment consistency
- Improved the development workflow by integrating Git CI/CD pipelines, including Docker

CodeIgniter · Node.js · Nuxt.js · Express · MySQL · PostgreSQL · SSMS · Docker · Git

**PT Hartono Istana Teknologi (Polytron)** · Jakarta, Indonesia

Feb 2025 — May 2025

*Full Stack Developer*

Developed full-stack web applications using Node.js (Express), CodeIgniter, Go, WordPress, MySQL and Docker.

- Developed APIs and their documentation for a chatbot
- Resolved and fixed bug issues in web applications
- Resolved security threats found with Burp Suite and OWASP ZAP
- Designed and implemented UAT for web applications

Node.js · Express · CodeIgniter · Go · WordPress · MySQL · Docker

Full Stack Developer Intern

Developed full-stack web applications using Node.js (Express), CodeIgniter, Go, WordPress, MySQL and Docker.

- Resolved and fixed bug issues in web applications

Node.js · Express · CodeIgniter · Go · WordPress · MySQL · Docker
